

Case Study

How Bluebird Storage Scaled Reviews and Search Visibility with StorageReach

Executive Summary

Bluebird Storage partnered with StorageReach to increase review volume, improve ratings, and drive more visibility through Google search. Within just a few months, the results were dramatic.

The Challenge

Before implementing StorageReach, Bluebird Storage had a steady but limited flow of customer reviews and consistent (but capped) visibility in Google's map pack.

- Review volume was growing slowly
- Website traffic from Google was plateauing
- Search visibility remained relatively flat

They needed a way to generate reviews consistently and at scale without disrupting operations.

The Solution

After consideration, Bluebird Storage decided to implement StorageReach to help.

This Approach Included:

- Automatically request reviews at key customer moments (move-ins, move-outs, and current tenants)
- Maintain a steady, compliant flow of new reviews
- Increase engagement with Google listings
- Provide consistent momentum instead of sporadic spikes

The Results

1. Explosive Growth in Review Volume

Month	Growth in Review Volume
November	48 Reviews
December	56 Reviews
February	240 Reviews
March	330 Reviews

In just a few months, Bluebird increased review generation by **5–6x per month**.

2. Improved Star Rating

Timeline	Average Star Rating
Before	4.78 Average Rating
After	4.81 Average Rating

Not only did volume increase, but quality remained strong, even improving slightly at scale.

3. Increased Website Traffic from Google

Month	Website Traffic from Google
November	2,400 Clicks
December	2,500 Clicks
March	3,300 Clicks

That’s a **30%+ increase in website traffic** driven directly from Google Business listings.

4. Massive Boost in Google Map Pack Visibility

Timeline	Google Map Pack Visibility
November through February	~30,000 – 32,000 monthly appearances
March	116,000 appearances

A nearly **4x increase in visibility** in the Google map pack.

This is where high-intent customers are searching for storage, and Bluebird dramatically increased their presence there.

Why it Worked

StorageReach helped Bluebird:

- Create a **consistent flow of fresh reviews** (a key Google ranking factor)
- Increase **engagement signals** (clicks, interactions, conversions)
- Build **trust at scale** with a growing volume of positive feedback
- Stay top-of-mind in local search results

The compounding effect of more reviews + higher engagement = significantly more visibility.

The Takeaway

By implementing StorageReach, Bluebird Storage didn't just get more reviews, they unlocked a growth loop:

More reviews → Higher visibility → More clicks → More customers → More reviews

Final Impact Snapshot

Bluebird Storage	
	6x increase in monthly reviews
	Rating improved from 4.78 → 4.81
	4x increase in Google map pack appearances
	30%+ increase in website clicks
